

Thread Lengths – all rows use 2.5 lengths of thread/yarn. A length of thread is a piece of yarn/thread equal to one width of your fabric. So, for each row, you would measure out a length of yarn/thread that is 2.5 times the width of the fabric you are working on. The bottom center of the pattern is indicated by the arrow on the pattern. When you get to the end of a row, tuck the thread/yarn to the back and run through about 5 floats. Turn your needle and going over the last float, run your thread/yarn back through the floats to secure them (see photo).

For the rug shown, I used *Lion Brand Wool Ease yarn in White Mutli*. To do this design on a huck towel or Aida cloth, pearl cotton #5 works best. For the rug a #13 needle works well. For Huck toweling or Aida fabric, consider using a #20 or #22 needle.

This pattern can be done as a single section using rows 1 – 16 once, or to cover a larger area, you can “stack the pattern”. After doing rows 1 – 16, repeat the pattern, making sure rows 1 and 16 use the same set of floats of the straight stitches (see photo close-up of design). Last photo is of design done on a rug.

BROKEN ARROW
